

## High Purity Inorganics

# Metals & Materials

for your research

## Overview of Inorganics

- **Premion®**

Premion is Alfa Aesar's trademarked name for high purity precious metal compounds and pure elements. The minimum purity for Premion pure elements is 99.99% (metals basis).

- **Puratronic®**

Puratronic high purity base metals and salts are the leading choice of pharmaceutical and electronic companies as the basic Inorganics for many research and development processes.

- **Reacton®**

Alfa Aesar's high purity rare earth metals, alloys and compounds constitute the REacton product line.

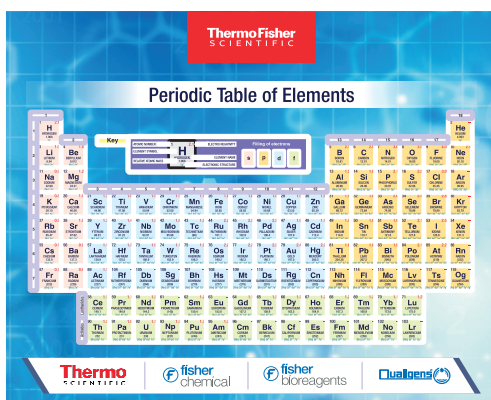

- **UltraDry™**

Alfa Aesar provides a comprehensive line of ultra dry materials, the first choice for air and moisture sensitive applications.

## Metals & Materials

### Precious Metals

- Ag, Au, Pt- PGM (Ru, Rh, Pd, Os, Ir)
- e.g. Catalytic converter, Fuel cells

### Pure Elements

- Metals (Fe, Ti) & Non metals (Si, S) - Base metals (non precious)
- e.g. Conductors, Plating, Deposition applications

### Alloys

- E.g. Stainless steel, Inconel, Hastelloy
- e.g. Welding, brazing, soldering applications

### Carbon Graphite

- Amorphous, Graphite, Diamond, Graphene
- e.g. Battery, Lubricant, Refractories

### Nanomaterials, Sputtering Targets, Etchants

- Nano size powders, copper, aluminum etchant.
- Sputtering targets for film deposition.

**Pure Metal, Alloys & non-metallic elements in various purities, forms, size & shapes**  
**33 form listings- Ingot, powder, wires, pellets, flakes, rod etc. - thin foil / sponge / slug**

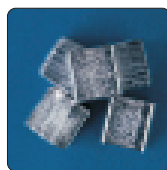

## Metal types

Bar

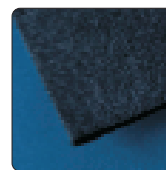

Casting grain

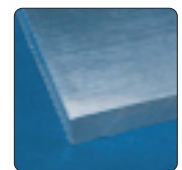

Cubes

Discs

Felt

Plate

Flake (Powder)

Foil

Gauze

Granules

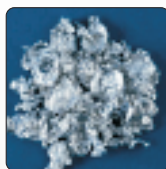

Ingot

Sponge

Lump

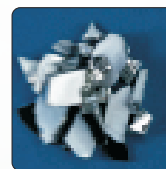

Mossy

Needles

Pellets

Pieces

Rod
